Mud, renews our passion to work with natural materials, stories of crafts and beauty.

Craftsmanship detail with a minimalist design language and two complementary speeches conducting it: square and diamond shapes.

Showcasing an organic based colour palette linked by earth and two traditional decors: “paths” and “pottery”, breathing authenticity and character into it; lovingly crafted for you.

And more! three wooden diamond colours: Light, Mid & Dark adding a touch of warmth to the range.

Mud, es reconexión con la natura, con la belleza de lo hecho a mano y los detalles artesanales.

Diseño en un lenguaje minimalista y dos discursos complementarios que lo conducen: las formas cuadradas y las diamantadas.

Proyectando una paleta de colores de base orgánica e inspirada en la tierra y dos decorados tradicionales: “Paths” y “Pottery” que respiran autenticidad y carácter.

Además tres diamantados en madera! Light, Mid y Dark que aportan un toque de calidez a la gama.

WAREHOUSING
In order to guarantee the characteristics of the finish the product must be kept in its original packaging until the time of fixing. If the product is likely to be stored for a long period of time it should be suitably covered.

TILE FIXING
To ensure the products adhere correctly to the surface, it is essential to use specific adhesive and grouting material. This must also be suitable for the environment they will have to withstand. Fitting with traditional mortars does not ensure good adhesion.
Due to the nature of the material there may be dimensional variations between pieces. Therefore, all types of joints must be planned and carried out correctly: structural, perimeter, expansion and installation joints. Fitting tiles without joints is not advisable from any technical point of view as this may lead to various problems. For an optimal result we advise to use 2 mm (0.08") grout.

MAINTENANCE AND CLEANING
Once the materials have been fitted, it is advisable to remove any remaining adhesive and grouting material by using a commercial descaling product designed especially, diluted with water. The descaling product must not remain in contact with the surface to be cleaned for more than 5 minutes. As a general guideline, powder detergents should not be used, not wire wool or abrasive materials. Generally a sponge will be sufficient with warm water and liquid neutral soap. Then rinse with plenty of clean water.

CHROMATIC VARIATION
This collection has been designed with a lightly chromatic variation between pieces. Prior to any installation, range of tiles should be checked by the client. No claims will be accepted after installation.

Dry-pressed ceramic tiles with water absorption B I a ≤ 0,5% for interior and exterior floors and walls. Baldosas cerámicas prensadas en seco con absorción de agua B I a ≤ 0,5% para suelos y paredes interiores y exteriores.
